Big Data - Foundations and Applications

Lesson #6 - Geocoding

Ivanovitch Silva

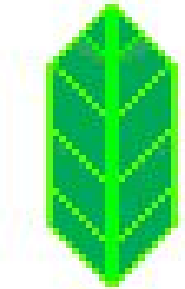
July, 2017

What is geocoding?

Geocoding is the process of transforming a description of a location.

API

Geocoder



Folium

Where students are from?

Studying about frequency

	id	industry	country	city
0	10001	Agriculture	United States	Davis
1	10002	Arts & Education	Australia	Perth
2	10003	Arts & Education	Austria	Lieboch
3	10004	Arts & Education	Brazil	São Paulo
4	10005	Arts & Education	Canada	Georgetown
5	10006	Arts & Education	Canada	Hamilton
6	10007	Arts & Education	Canada	Milton
7	10008	Arts & Education	Canada	Mississauga
8	10009	Arts & Education	Canada	Regina
9	10010	Arts & Education	Canada	Toronto

Geocoder + folium + open data + assessment

http://ckan.imd.ufrn.br/

- Implementing reporting figures about the number of "municipal schools"
- A heatmap figure considering the number of employees in each unit (#assessment)

Tips

Notebook

```
# Import pandas
import pandas as pd

# Assign url of file: url
url = 'http://ckan.imd.ufrn.br/dataset/bfe9529d-5a43-49e1-b855-8f1caff9f123/re

# Read file into a DataFrame and print its head
df = pd.read_csv(url, sep=';')
```
